## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 5-11 and 14-18, drawn to a method of inhibiting inflammation in a host by contacting said host with an integrin linked kinase antisense, classifiable in classes 536, subclass 24.5.
- II. Claims 1, 3, 5-10, 12 and 14-18, drawn to a method of inhibiting inflammation in a host by contacting said host with an integrin linked kinase antibody, classifiable in classes 424, subclass 130.1.
- III. Claims 1, 4, 5-10 and 13-18, drawn to a method of inhibiting inflammation in a host by contacting said host with a small organic molecule which inhibits integrin linked kinase, classifiable in classes 530, subclass 300.

Claims 1, 5-10 and 14-18 are generic to the Groups I-III. Upon election, claims 1, 5-10 and 14-18 will be examined only to the extent that they read on the elected invention.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I, II and III are unrelated, each from the other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. Inventions of Groups I, II and III are distinct because they are drawn to methods using different

Art Unit: 1635

materials having different chemical structures, different physical properties and different biological functions. For example, the integrin linked kinase antisense of Group I binds to nucleic acids and the integrin linked kinase antibody of Group II binds to proteins. The differences between Inventions I, II and III are further underscored by their different classifications and independent search status. Thus, they are patentably distinct from each other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
